

# CURBSIDE CONNECTION

## A NOTE FROM THE PRESIDENT

As we welcome the summer season, we are filled with gratitude for our community's resilience and excited to announce that our administrative office has relocated to 3320 Main Street, Suite J, Anderson, Indiana – a move that reflects our ongoing commitment to growth and accessibility. We also recognize the challenges brought on by recent Medicaid policy changes affecting many of our clients, and want to assure you that our team is actively working to navigate these shifts with a focus on continuity of care, including thoughtful adjustments to our ABA service delivery structure.

April's Autism Awareness Month further reminds us of the incredible community surrounding us, and as we look ahead, we remain hopeful and steadfast in our mission to ensure every individual we serve has the opportunity to thrive – thank you for your continued trust and partnership.

### *A Fond Farewell to Our Alexandria Center*

We bid a heartfelt farewell to Conduct Curb's Alexandria ABA Center, which officially closed its doors on January 30, 2026. For three incredible years, this clinic served our community with dedication, compassion, and a deep commitment to the families who relied on them. Conduct Curb was a true pioneer in Alexandria – arriving when no other providers were within 30 miles – and their impact will not be forgotten. We wish all staff and families a smooth transition as they move forward with the Anderson Centers. Thank you, Conduct Curb, for the lives you touched here.

## CURBSIDE CONNECTION

### PRESCHOOL HAPPENINGS

We are having as much fun as possible in preschool! We have learned about arctic animals adapting, hibernating, and migrating. We moved on from there to explore Valentine's Day and our emotions. Clients did a great job of identifying and expressing emotions with the activities for February. Now we are farming, and what an experience it has been. We've introduced animals and animal sounds, hay and straw, and tried several fruits and veggies grown on farms. The children have enjoyed playing with new farm toys, touching and smelling hay, straw, and dried corn, and being exposed to new foods.

We continue to work on skills such as cutting, writing, and 1:1 correspondence in counting. Wonder how you could help at home? Ask your child to help you count forks or plates for dinner. Let them pretend to write a grocery list, or have them point out words and letters they know on your list. If you take them to the store, play I Spy with colors and shapes. These are all ways to help review what we are learning daily in preschool. Another great way to assist in daily learning is spend a few minutes reading, or even just looking at pictures, in a book each evening.

I look forward to ending this preschool year strong! I can't believe the progress that is being made daily. The hard work from both the clients and therapists amazes me!

-Miss Molly

### NEW CASTLE

Clients at the New Castle clinic continue to make meaningful progress in communication, functional play, and daily living skills. We've seen reductions in targeted behaviors for several learners, and many clients are beginning to generalize skills across therapists and environments — a key milestone toward greater independence.

Our clinical team remains focused on data-driven, individualized treatment. Behavior Intervention Plans are being implemented with strong integrity, and regular program reviews ensure we adjust strategies as clients grow. Supervision and collaboration continue to be top priorities. Our RBTs and clinical staff have shown outstanding dedication and teamwork, keeping sessions structured, engaging, and productive. We're proud of their continued growth through training and commitment to ABA best practices.

The New Castle clinic remains a positive, structured space where clients are encouraged to learn, build independence, and thrive safely. We're excited to keep celebrating client achievements and growing our team as we work toward even greater progress. Thank you to our staff and families for your continued partnership.

-Chastity Renee Casanova, MA, Clinical Lead

## CURBSIDE CONNECTION

### ANDERSON: EARLY LEARNING CENTER

Our clinic continues to be a place of meaningful growth, with our kiddos showing steady progress and resilience across programs. It has been especially rewarding to see their skills generalize in new ways, reflecting both their hard work and the consistency of our team. We are also excited to share that we have successfully transitioned two of our kiddos to a least restrictive level of service, an important milestone that highlights the impact of individualized, high-quality care.

In addition to these successes, we are actively strengthening our school transition program to better support families and learners as they move into new educational environments. Our team is collaborating to make this process more comprehensive, ensuring each child is equipped with the skills and confidence needed for success. We are also in the process of updating our gross motor room, which will provide enhanced opportunities for reinforcement, movement, learning, and regulation!

Looking ahead, we have begun planning and preparing for our summer activities, with a focus on creating engaging, enriching experiences for our kiddos. We are energized by the direction our clinic is heading and remain committed to fostering a supportive, dynamic environment where every child can continue to thrive.

-Dr. Gwen Martin, BCBA-D, Clinical Manager

### ANDERSON: SCHOOL-AGED CENTER

This quarter has been marked by steady growth across our clinic, with a clear rise in meaningful peer play and social engagement among our learners. Therapists maintain a consistently high level of interaction, modeling appropriate communication while keeping sessions upbeat and productive.

We're also seeing strong implementation of behavior-reduction strategies, with teams responding promptly and effectively to challenging moments. Families can feel confident that skill development is moving in the right direction and that each child is being supported with intention and care.

Overall, our site is making excellent clinical strides with our clients and, and we're excited by the growth we continue to see each day. While it begins to warm up outside, we are excited to explore new outdoor reinforcers and enjoy beautiful weather.

Stay tuned to Conduct Curb on our various social media platforms for updates to treatment and scheduling!

-Ben Lawson, MA, BCBA and Clinical Manager

## CURBSIDE CONNECTION

At Conduct Curb, we love to celebrate our employees' work anniversaries.

Below, we introduce some of our staff that have work anniversaries in the first quarter of 2026!

**Sarah Spicer**  
Registered Behavior Technician  
1 Year
